**Durable and versatile, Compact 4 and Compact 6 radiators offer a range of cost-effective, rapid heating solutions for homes and working environments.**

### 10-YEAR WARRANTY

Each radiator is individually tested and supplied complete with a 10 year warranty against any defects as a result of a manufacturing or a material fault.

All radiators are pressure tested at 13 Bars before despatch to guarantee a working pressure of 10 Bars.

**Quality:** all radiators are manufactured under BS EN ISO 9000 quality system accepted by BSI.

**Material:** conforms to BS1449, Part 1, products are manufactured from 1.20mm cold rolled steel.

**Installation:** each radiator is supplied with concealed brackets, 1/2 self-jointing air vents and plugs in protective, heavy duty packaging.

### INSTALLATION GUIDE

For maximum efficiency, radiators should be fixed at no more or less than the measurements given on the drawings herein, from finished floor level.

We supply a bottom opposite end (BOE) connection pipe positioning guide for the manual valve, please allow 35mm to the centre of the pipe. For TRV valve allow 45mm to pipe centre. To prevent damage, it is strongly recommended that protective packaging is left on the radiator until installation is complete. Simply remove lug protectors and pre-cut tapping connection.

**Finish:** each radiator is degreased and electrostatically powder coated with epoxy polyester stove enamel, after an application of water based primer. Oven baked to provide a high gloss finish in white enamel (RAL 9016) or Anthracite (RAL 7016), the finished surface requires no further painting.

**Water Treatment:** on completion of the installation the system should be properly flushed and filled in accordance with the British Standard Code of Practice for the Treatment of Water in Domestic Hot Water Central Heating System BS7593.

### IMPORTANT

Please read the following points carefully before installing your ULTRAHEAT radiator:

**DO** make sure that you have considered the design and layout of your central heating system as this will ensure satisfactory functioning of the system in general, and the radiators in particular.

**DO** vent your system properly. Leak and corrosion problems are usually due to excess air getting into the system.

**DO** ensure that the drain points are at the lowest points in the system.

**DO** make absolutely certain that the system is thoroughly flushed before it is commissioned. Rinse out all metal, flux and other foreign residues; the cause of pin-holing.

**DO** avoid over pumping the system, which causes negative pressure aeration, one of the most common causes of corrosion.

**DO** add an approved chemical inhibitor as an additional safeguard, but remember that it is no substitute for good installation practice.

**DO** observe the above basic guidance. Not only will you protect your warranty, but you will have years of trouble-free service from your radiator.

**DON'T FORGET** - the best radiators deserve the best installation practice.

DELTA FACTORS IN °C OTHER THAN ΔT50 AT 20°C ROOM TEMPERATURE			
15°C	4.9779	50°C	1.0000
20°C	3.3923	55°C	0.8807
25°C	2.5194	60°C	0.7842
30°C	1.9758	65°C	0.7049
35°C	1.6088	70°C	0.6386
40°C	1.3465	75°C	0.5824
45°C	1.1508	80°C	0.5344

Divide the heat outputs to ΔT50 by respective coefficient above to achieve the corrected heat outputs.
